THE AMATEUR RADIO EMERGENCY SERVICE

The radio amateur best justifies his existence by the service rendered to the community in times of disaster and distress when normal communications media are not available, have failed or are badly overburdened.

In the event of a communications emergency all amateurs are dedicated to serve in the public interest, within their ability, to provide temporary communications for a stricken area until normal facilities are restored.

The ARRL Amateur Radio Emergency Service is composed of licensed amateurs who have voluntarily registered their qualifications and equipment for communication duty in the public service when disaster strikes.

Further information on the Service may be obtained from your Section Manager, Section Emergency Coordinator or ARRL Headquarters. Visit www.arrl.org/sections.

BEFORE EMERGENCY

Prepare yourself by providing radio equipment together with an emergency power source upon which you can depend.

Test both the dependability of your emergency equipment and your own operating ability in the annual ARRL Simulated Emergency Test and the several annual on-the-air contests, especially Field Day.

Register your facilities and your availability with your local ARRL Emergency Coordinator. If your community has no EC, contact your local civic and relief agencies and explain to them what the Amateur Service offers the community in time of disaster.

IN EMERGENCY

Listen before you transmit. Never violate this principle.

Report at once to your Emergency Coordinator so that the EC will have up-to-minute data on the facilities available. Work with the local civic and relief agencies as the EC suggests. Offer these agencies your services directly in the absence of an EC.

Operate on the air in accordance with FCC regulations.

SOS and "Mayday" are the International distress calls for emergency only. They are for use only by stations seeking emergency assistance.

Respect the fact that the success of the amateur effort in emergency depends largely on circuit discipline. The established Net Control Station should be the supreme authority for traffic routing.

Cooperate with those we serve. Be ready to help, but stay off the air unless there is a specific job to be done that you can handle more efficiently than any other station.

Copy all bulletins from W1AW or check the ARRL Web site. During time of emergency, bulletins will keep you posted on the latest developments.

AFTER EMERGENCY

Report to ARRL Headquarters and your ARRL Section leaders as soon as possible and as fully as possible so that the Amateur Service can receive full credit. Report your activity with the ARRL Public Service Activity Report form (FSD-157) at www.arrl.org/FandES/field/forms/ (printable and on-line versions are available).
